PROFESSIONAL SUMMARY

IT Specialist with experience in L1, L2, and L3 technical support, incident management, troubleshooting, and system administration in enterprise environments. Full Stack Developer with experience developing web applications and mobile apps, focused on building scalable and integrated solutions. Skilled in databases, data analysis, and cloud technologies, with a strong focus on automation, process optimization, and performance improvement. Results-driven, with strong problem-solving skills and adaptability to structured corporate environments.

WORK EXPERIENCE

Software Architect & Full Stack Developer – News Mx TV

México City (Remote Job), - *April 2025 – April 2026*

Designed and implemented scalable full-stack architecture for a digital news platform, improving performance and maintainability.

Developed and optimized RESTful APIs and database structures, reducing response times by up to 40%.

Led end-to-end development lifecycle, from system design to deployment in production environments.

Integrated responsive UI/UX interfaces, enhancing user engagement and accessibility across devices.

Implemented data management solutions using modern databases, ensuring efficient content delivery and storage.

Collaborated with cross-functional teams to define technical requirements and deliver high-quality features on schedule.

Applied best practices in clean architecture, code quality, and version control, improving system reliability and scalability

IT Operations Trainee & Data Specialist – Pallet Tarimas Y Cajones

Aguascalientes, Aguascalientes, México, - *Jun 2024 – Febrary 2025*

- Provided L1–L3 support (incident resolution, troubleshooting, RCA) and managed Windows Server and cloud environments for high availability
- Developed Full Stack inventory system (REST APIs, SQL Server) reducing incidents by 25%, and built ERP desktop app (C# .NET, React, Electron) with inventory and process modules
- Performed data analysis (Python: Pandas, NumPy, Matplotlib, Seaborn), EDA and reporting; built dashboards/KPIs (Power BI, Tableau) with ETL and data modeling, improving efficiency by 35%
- Automated workflows with cron jobs, integrated Zebra printers (ZPL), and configured Azure VPN (VNet + VPN Gateway)
- Supported Azure FinOps (cost monitoring, budgeting, tagging)
